Training Vendor Management Software powered by Enterprise Study

The Best kept secret in HR Technology

Do you have numerous suppliers of training? Does your LMS fall short when managing public bookings and training vendors? Can you guarantee your employees are always booking through your preferred vendors? Is reporting on training spend as simple as a press of a button?

External training is costly and for many organisations the spend is difficult to control. Enterprise Study's **LearningNetwork** helps organisations save time, money and resources by providing a unique online training portal that takes the hard work out of public course bookings.

Working with over 60+ training vendors within the UK and Europe **LearningNetwork** incorporates market leading vendors such as QA, Global Knowledge, Hemsley Fraser, SAS, ILX, Kaplan, Learning Tree, Pluralsight, Skillsoft, British Red Cross, St John Ambulance and many more.

Used by Central and Wider Public Sector, multinationals such as CGI and Sopra Steria, **LearningNetwork** is the best kept secret in

HR technology. £5million + worth of training has been procured through the power of the **LearningNetwork** platform and with customers taking advantage of £650k of negotiated discounts.
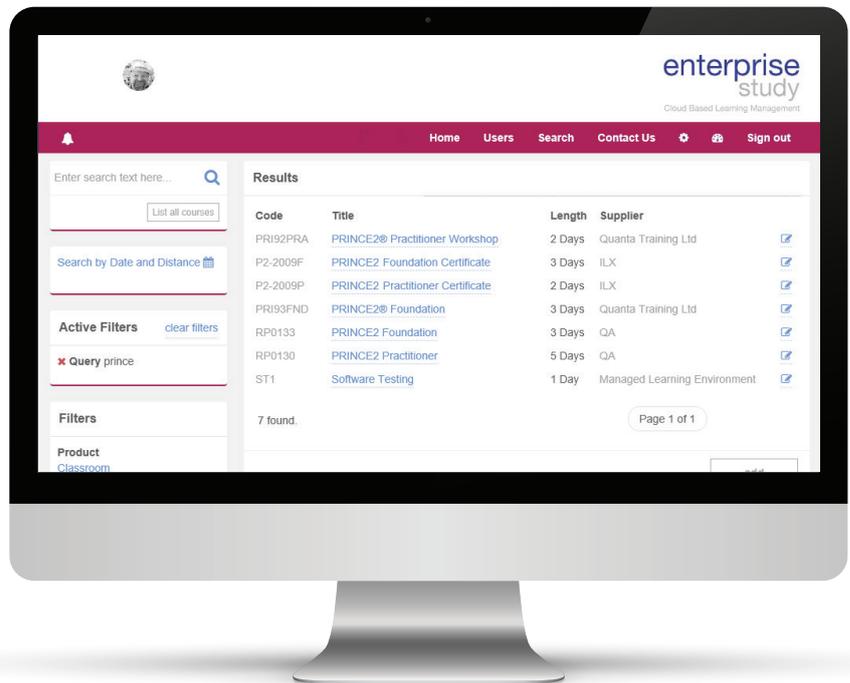

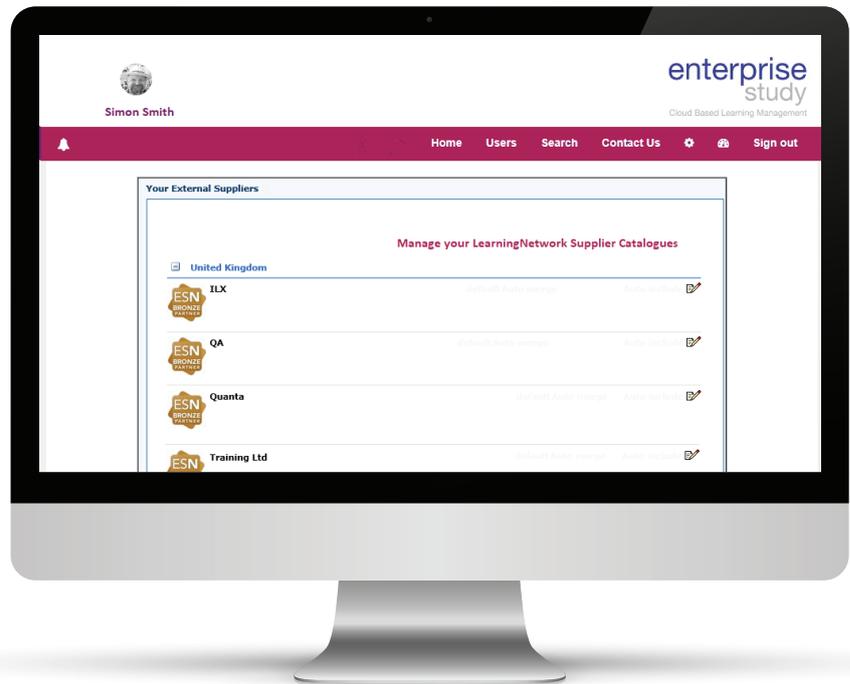

How does it work? By providing a consolidated view of course offerings from approved vendors, and a centralised self-service booking process to procure from them. Courses are self-served through an automated procurement channel that supports your internal authorisation process and represents the payment, cancellation and discount terms that you've agreed with each of your preferred suppliers.

LearningNetwork can be used as part of the Enterprise Study LMS suite, or connected to an incumbent LMS.

Why use LearningNetwork?

- It is tried and tested. **LearningNetwork** is used by over 25,000 public sector and corporate users, is safe and secure.

- Over 60 of the UK's largest training suppliers on the network. New suppliers are added regularly as customers demand them.

- Take control of external training spend, reduce non-approved spend or payment methods and negotiate better terms with vendors. One customer saved over £100k by taking control of their spending using **LearningNetwork**.

- Quality control your training vendors using LearningNetwork automated course evaluation. If the quality of a vendor drops below par simply switch to another at the click of a button.

- LearningNetwork enhances your LMS, ensuring a full-stack solution within your learning eco-system.
